

a) Bottom-up Memory Building

b) Top-Down Retrieval

If L is given, rerank based on Spatial Proximity:

$$P(A|Q, L): [\text{●} \text{●} \text{●} \text{●} \text{●} \text{●} \text{●} \text{●}]$$

If U is given, rerank based on Other sensor data:

$$P(A|Q, L, S): [\text{●} \text{●} \text{●} \text{●} \text{●} \text{●} \text{●} \text{●}]$$

c) Generation
